

Exivious biography

Fusionmetal - A relatively new and unexplored genre in the world of metal. **Exivious** marks a first to truly marry jazzfusion with metal into a coherent new style. Featuring two ex-members of legendary US prog band **CYNIC** and drummer from Dutch metallers **TEXTURES**. With a jazzfusion backbone Exivious uses freaky metal riffs to decorate their organic eruption of free improvisations and complex rhythms.

After being inactive for more than a year due to other commitments, Exivious is now back! Guitarist Tymon comments: "We're extremely excited to finally being able to give Exivious the attention we believe it deserves!" A follow up to their highly acclaimed debut album is in the works and the band will start playing live soon!

Exivious is:

Tymon	guitars
Michel Nienhuis	guitars
Robin Zielhorst	bass
Stef Broks	drums
